## ABOUT ME

I am a vibrant and adaptable professional with a well-rounded background in pharmaceutical dispensing, logistics, academic and hospital leadership, sales, and product promotion. My career began in logistics and distribution, where I gained essential knowledge of supply chain operations. I later transitioned into leadership as a pharmacy department head, building strong client relationships and expanding market outreach. Currently, I work as a lecturer and promoter, combining technical support with academic instruction. These experiences have given me a solid understanding of the healthcare industry's clinical and business aspects, along with strong communication and teamwork skills. I am now looking for a challenging opportunity to contribute meaningfully to community health while continuing to grow professionally.

---
